

## **Upcoming Kumihimo refresher and class after the January Thursday meeting**

At our February Thursday meeting, Giovanna Imperia will be here speaking about Kumihimo and teaching a Kumihimo Braiding with wire workshop the Friday and Saturday after. If you would like a refresher or have not tried kumihimo before, we will be holding an informal overview of how a Marudai or foam disk is used to make a kumihimo braid at the end of the January in-person guild meeting.

Attached are some very basic directions you can print out and follow along at home provided by Patricia. We will go over them and the materials at the end of the meeting. Those at the meeting will have the opportunity to work with another guild member who has some experience.

### **Materials needed**

Foam disc or Marudai

8 EZBob bobbins

2 oz weight

48-10/2 thread, embroider thread or soft ribbon (thrums about 1-2 yds long work great)

We will go over these materials and directions. Patricia has prepared 8 disc kits to loan and more threads to share if you already have disc and bobbins.

For those with experience please bring your equipment as we hope to have one-on-one attention.
